On-time

LAUNDRY

Beauty, design and performance are synonymous to the De Dietrich Laundry Collection.

With two stunning fully-integrated black models, complementing any kitchen design, both the washer and washer dryer offer a wide choice of programmes providing total flexibility to suit individual needs.

With A energy ratings to the washing machine range and built-in safety features as standard, De Dietrich laundry appliances inspire all round confidence in performance and washing satisfaction.

DESIGN & PERFORMANCE....

A CLASS ENERGY

30 MINUTE QUICK WASH

Washes a full load in the shortest time

7KG CAPACITY

More laundry can be washed at any one time saving time and energy

PERFORMANCE

- **A Energy Class:** De Dietrich excellence is continued in its Collection. The DLZ714BU integrated washing machine is rated A for energy and both washer and washer dryer achieve class A status in washing giving outstanding performances.

FEATURES ON INTEGRATED MODELS

- **7kg Capacity:** DLZ714BU boasts a 7kg load washing capacity so more laundry can be washed in one load, saving time and energy. De Dietrich washer dryers also offer flexibility with a half-load wash-to-dry feature for added time and energy saving benefits.
- **Electronic Display:** an easy-to-use LCD display provides key information at the touch of a button to make life easier:
 - **Total time remaining**
 - **Wash cycle indication**
 - **Delayed start information**
 - **Function data**
 - **Spin details.**
- **Automatic Variable Capacity:** by monitoring the water level during the wash programme, the machine calculates the precise amount of water required through the whole cycle, resulting in the best wash possible with the least amount of water, saving both the environment and the reducing the cost of utility bills.
- **Load Balance:** load balance is a system that electronically controls and evenly distributes the clothes in the drum during the spin cycle. The load balance will also eliminate vibration, reducing noise and increasing the durability and life of the machine.

...A BEAUTIFUL COMBINATION

THE PERFECT FIT

Beautifully designed to blend with the furniture

ELECTRONIC DISPLAY

Giving key information at a glance

LOAD BALANCE

Electronically controls & distributes the load in the drum

SAFETY

- **Foam Suppression:** if too much foam is detected in the wash, extra water is added making sure that the foaming is reduced and ensuring both the machine and laundry is given the best possible care.
- **Anti-overflow:** an internal water level monitoring system which prevents water from entering the machine when a leak is detected.
- **Safety Lock:** all De Dietrich laundry products have a safety lock which has a two minute delay to ensure the drum is quite still and the programme has ended correctly.

WASH PROGRAMMES

- **Quick Wash:** a full load is completed within 30 minutes on a short wash and rinse with a long spin cycle. An ideal programme for lightly soiled clothes.
- **Easy Iron:** a programme which helps reduce time spent ironing – in some cases up to 50% based on fabric type. This programme intermittently and gently tumbles the load to prevent the contents from creasing thus making ironing easier.
- **Intensive Wash:** this is an extended wash cycle to achieve better wash results first time for heavily soiled and stained clothing.
- **Prewash:** a cold wash to loosen dirt and stubborn stains before the main wash.
- **Wool Wash:** a gentle woollen programme with a soft wash and spin to ensure woollens retain their shape.
- **Delicate Wash:** a kind and gentle programme for mixed fabric allowing hand-wash garments to be washed in a machine.
- **Extra rinse:** an additional rinse to remove the maximum amount of detergent from a wash - ideal for anyone with sensitive skin.

LAUNDRY 60CM FULLY INTEGRATED WASHING MACHINE

DLZ714BU
BLACK

Washing capacity: 7kg
AAB class (Energy / Washing / Spinning)
Spin speeds: 400 – 1400 r.p.m

AUTOMATIC VARIABLE CAPACITY

The machine will monitor the size of the load & will adjust the water intake & duration of the programme accordingly

ECO WASH SYSTEM

Saving costs & the environment

15 PROGRAMMES INCLUDING

- Quick wash (30 minutes)
- Easy iron
- Intensive
- Prewash 60°C
- Cold wash
- Wool 35°C
- Delicates

FEATURES

- 49 litre stainless steel drum
- 30cm portal with 180° opening
- Polyurethane tub
- 4 adjustable feet
- Reversible furniture door
- Cold fill only

SAFETY

- Foam suppression
- Anti-detergent leak
- Anti-overflow
- Load balancing – detects uneven loads in spin & stabilises
- Safety lock during wash cycles

LCD DIGITAL DISPLAY

- Electronic clock with delayed start 1 – 24 hours
- Wash progression information
- Wash time remaining
- Cycle & spin speed information

CONSUMPTION

49 litres

DIMENSIONS (MM)

Built-in: H 850 x W 596 x D 570
