"My profession was ignited from a coal-fire stove 40 years ago, and since then I have put my heart and soul into creating cuisines that are creative, close to perfection and delicious. When De Dietrich, which shares the same perpetual search of excellence, suggested a collaboration, I accepted with great enthusiasm so that together, we can transmit our shared love and passion for fine cuisines. From simple processes to sophisticated techniques, everything is possible and your creativity knows no bounds; thanks to the ultra efficient and high performing kitchen appliances from De Dietrich. Love, art and technique come together to make fine cuisines."

DE DIETRICH THE ART OF LIVING
THE PHILOSOPHY OF EXCELLENCE

Ovens
Multi-function Plus
An association of the 3 heating elements and the fan at the same time, accelerates the cooking cycle with its perfect heat distribution. Able to cook different types of food that need different cooking results.

Chef
A 100% automatic cooking mode for those gourmets who are anxious that their recipes always be cooked to perfection. Sets all the cooking parameters from time to the temperature. No preheating necessary. Choose the dish and let Chef do the rest.

Culinary Guide
A semi-automatic cooking mode. Pick the dish, input the weight and the oven does the rest. Choose from 15, 35 or 50 dishes.

Low Temperature Cooking
Another 100% automatic cooking function that delivers incomparable results. Allows food to be cooked over a long period of time to maintain more flavour and tenderness. Endorsed by Chefs. Low Temperature Cooking will help you rediscover the taste of food.

Pastry Function
14 automatic pastry cooking methods from the very best of the French Pastry heritage. You create your own recipe and let this function do the rest.

Hobs
Auto Pan Detection
Detects when a suitable pan is placed on the cooking zone and so eliminates the possibility of the hob being activated accidentally by a non-suitable object.

Recall
Calls back all power and timer settings in case of an accidental stop of the appliance.

ICS
Indicates the heating zone which is best suited to the size of the pot, maximizes efficiency.

Switch
This function offers the advantage of being able to move its pan from one zone to another while maintaining the same parameters (cooking time and timer) at the press of one button.

Boil Function
This setting takes away the guess work for boiling certain foods. Simply set the volume of water to be brought to the boil and once food is added just set the desired cooking time.
Revisiting steel, glass, stainless steel and copper through the eyes of a master craftsman, De Dietrich has transformed raw materials into breathtaking results, marking this as a uniquely sophisticated collection at the cutting edge of technology.
